

Accelerating Water AI

Watervent San Francisco

October 24, 2025

Water Utilities and AI

1. ROI using AI in enterprise is very hard!
 1. genAI is trained on human language; doesn't understand structured data
 2. Data assets (databases, spreadsheets) are scattered throughout water utilities and siloed across departments
 1. Not organized for use by genAI
2. Key Opportunities
 1. Electricity and Treatment Cost Reduction
 2. Compliance
 3. Operations Efficiency
 4. Finance Transformation

AixxInt

Cloud Software Platform

- **Securely access structured data assets across the utility**
 - **Spreadsheets, Databases**
 - **Across department siloes**
 - **Federation with external data (regulators, partners...)**
- **Abstract structure for use by genAI**
 - **Patent pending: extracting structure from spreadsheets**
 - **Patents in development: Databases**
- **Side benefit: Cloud migration**

Projects

Mojave Water Agency

O&M Cost Reduction

California Rural Water Association

O&M Cost Reduction

United Water Conservation District

O&M Cost Reduction

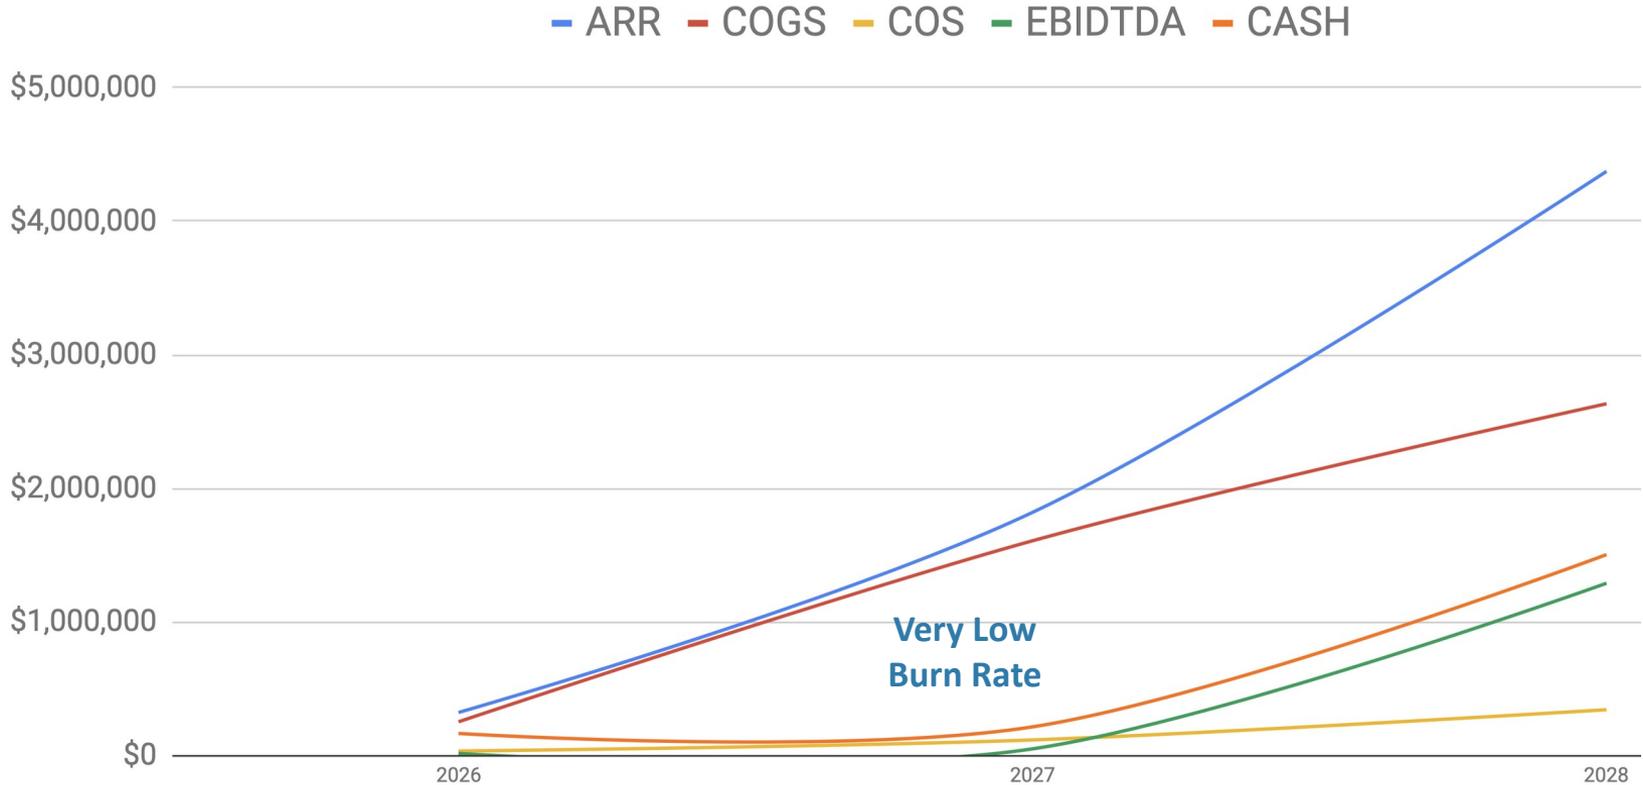

Moulton Niguel Water District

Finance Department
Digitization

Orange County Water District

Compliance Automation

The Business

Per customer ARR: \$50K

Customer Annual Value:

Why Invest in AIxxInt?

Software

- Faster Time to Market
- High capital efficiency
- Very high gross margins

Execution

- Proven Team
- Deep Network
- Deep Market Knowledge
- Patent Pending Deep IP

Market

- AI: Invest in the Reality, Not in the Hype
- Extreme M&A -> Early Exit Potential

Scale

- After Utilities:
 - Water engineering companies
 - Agriculture, Manufacturing
 - General Enterprise

The Deal

\$750K pre-seed raise

Standalone Spinout from Aqaix

- **Separate, new executive team**
- **Transfer of key IP**
- **Leverage Aqaix ecosystem**
