

Leader in advanced plastic piping systems for water and energy

Extensive commercial reach

- Present in 45+ countries
- Recognized leader in Australia, Canada, France, Germany and India among others
- Extensive sales networks in the Construction, Infrastructure and Industrial sectors

Manufacturing excellence

 50+ manufacturing sites converting polymers into advanced products, with a usage life of 50-100 years, hence providing sustainable solutions to connect people with water and energy

R&D and innovation excellence

 First-rated expertise in piping, fittings/ connections, valves/automation, plastics/advanced materials, moulding/3D printing and sustainable water management at large

Long-term view

- Family-owned
- Solid industrial inheritage
- Entrenched values of lasting collaborations and sustainable innovation

Fast deployment

- Sustained and successful track of acquisitions over the last 20 years
- Can-do attitude

Collaborative

 Respect for diversity of acquired companies, for their customers proximity and market specificities

Aliaxis Ventures

Prioritized investment area: innovative and collaborative companies active in solving water-related challenges

We invest to support value creation for both startups and Aliaxis.

We leverage the Aliaxis Group and our 16,000 colleagues in sales & marketing, manufacturing, R&D and other areas to deliver value and impact.

We are collaboration-driven, even if no investment would eventually be made.

We build, we are do-ers, decisive and action-oriented.
